

### DETAILED ACTION

This office action is in reply to an amendment filed on February 12, 2010. Claims 1, 18, 35, 36 and 38 have been amended. Claims 1-36, 38-52 and 54 are pending.

### ***Response to Arguments***

Applicant's arguments with respect to 35 USC 112 First Paragraph have been fully considered but they are not persuasive. Applicant argues that, applicant's specification clearly describes and supports all the negative limitations cited in the claims. Examiner disagrees.

Examiner would point out that, the independent claims include multiple negative limitations..., the examiner cites MPEP 2173.05(i)

*"Any negative limitation or exclusionary proviso must have basis in the original disclosure. If alternative elements are positively recited in the specification, they may be explicitly excluded in the claims. See In re Johnson, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977) ("[the] specification, having described the whole, necessarily described the part remaining."). See also Ex parte Grasselli, 231 USPQ 393 (Bd. App. 1983), aff'd mem., 738 F.2d 453 (Fed. Cir. 1984). The mere absence of a positive recitation is not basis for an exclusion. Any claim containing a negative limitation which does not have basis in the original disclosure should be rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement."*

There are multiple negative limitation in the independent claims. Indeed, the specification must contain a full, clear and concise description of the claimed subject matter. The specification does not literally or implicitly exclude "user input does not include the pass code"... "...without transmitting the pass code to the remote authentication ..." "... without

generating the pass code ..." ... and therefore, the claims are rejected under 35 USC 112 First Paragraph.

Applicant's arguments, with respect to 35 USC 103(a) and 112 2<sup>nd</sup> Paragraph have been fully considered and are persuasive in view of amendment to the claims and therefore, the rejections have been withdrawn.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-35, 38-52 and 54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to mention or teach the limitation wherein transmitting a response to a remote authorization unit to authenticate a response without transmitting the passcode to the remote authorization unit and without generating the passcode from the user input prior to said transmitting.

Claim 36 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that

the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to mention or teach the limitation wherein validating the user on the basis of said response compared to the predicted response, wherein neither the response nor the predicted response is the pass code.

Claims 1-36, 38-52 and 54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification fails to mention or teach the limitation wherein the user input does not include the pass code itself.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BEEMNET W. DADA whose telephone number is (571)272-3847. The examiner can normally be reached on Monday - Friday (9:00 am - 5:30 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Y. Vu can be reached on (571) 272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
